

SolarX-2000 Specifications

The SolarX-2000 solar panel has an efficiency rating of 23.8%. It comes with a 25-year performance warranty and operates in temperatures from -40 to 85 degrees Celsius. Installation requires a south-facing roof with at least 20 square meters of unshaded area. The panel weighs 21.5 kilograms and uses monocrystalline silicon cells. Annual degradation is rated at 0.4 percent per year.

AquaPure Filter Manual

The AquaPure water filter removes 99.9% of contaminants including lead, chlorine, and microplastics. The filter cartridge needs replacement every 6 months under normal household use. A red indicator light signals when replacement is due. The unit fits standard 10-inch housings and handles a flow rate of 8 liters per minute.

Company History

The company was founded in 2019 in Pune by Priya Sharma. It started as a two-person workshop building solar prototypes. By 2023 it employed over 200 people across three factories. Its mission is affordable clean technology for Indian households.
